TEACHING ARITHMETIC IN YEARS 1 & 2

July, 1957, Truk District Education Department
(A Translation From The Trukese)

To the Teachers

This booklet is for the teachers. You should not give it to the children to read. We prepared this pamphlet as a guide in the teaching of arithmetic to small children in the first group. This book will aid you with the children who have just enrolled in school and also will be of help to those children who have been in school for at least a year. Will you please read this book before you teach from it? Please use the concepts of arithmetic and add your own ideas in the explanation of them. Don't think that children know what is in this booklet already; they do not understand it. One lesson could last for several days. It is very important to review the lesson several times, because the children will not understand what you have taught after you have gone over the material the first time. You may realize that these lessons are very similar to those in the Truk District Elementary School Curriculum of 1956. They are, in fact, just like those on pages 2 and 3 of the curriculum.

From

Mrs. Pickerill
and
Chutomu
